3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or render obvious a method for a motor vehicle with regenerative and anti-lock conventional brake system, wherein the regenerative brake system has a maximum regenerative braking value and the post ABS regenerative braking is limited for a given period to a predetermined limit value which is less than maximum regenerative braking value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crombez et al. teach a method of maximizing post-ABS regenerative braking.
